

DEXTER + CHANEY MOBILE SOLUTIONS

Dexter + Chaney Mobile Solutions Streamline Construction Management

Since Dexter + Chaney redesigned its Spectrum® Construction Software as a fully web-based platform for complete construction management several years ago, the company has been busy developing a host of mobile solutions to further streamline its clients operations. Its mobile apps and kiosks tie directly into Spectrum and help better connect contractors' field operations to the office.

The **Payroll Time Entry** app lets supervisors and project managers quickly and easily enter labor and equipment hours directly from the jobsite. Users simply select the appropriate job, then enter time for all employees and equipment assigned to that job. The app lets users assign and reassign people and equipment as needed, and provides tracking for supervisors to use when monitoring the labor and equipment costs associated with their jobs.

On the project management side, the **Project Plan Room** mobile app provides a powerful vehicle to distribute construction documents, communicate critical data and relay vital project information in real time to employees' and subcontractors' mobile devices on the jobsite. It allows users to remotely access the latest versions of plans, specifications, drawings and other documents.

FIELD TECH KIOSK

Additionally, Dexter + Chaney has been expanding access to Spectrum through a variety of kiosks tied to its Spectrum Dashboard. The kiosks give authorized users access to Spectrum remotely using mobile devices. Users can enter and view data via the kiosks, connecting them instantly to Spectrum's vast database and functionalities.

EMPLOYEE KIOSK

The **Employee Kiosk** provides a secure portal for employees to enter their own hours and payroll information, and to access other human resources information. They also can retrieve summaries of previous timecard entries and print out their earnings statements.

SUBCONTRACT KIOSK

The **Subcontract Kiosk** gives authorized subcontractors the ability to enter their own progress billings and submit them electronically into Spectrum's Invoice Approval.

Service technicians and other field operations staff can remotely access, create and update work orders in the field, via the **Field Tech Kiosk**. Using a tablet device, technicians can access the Field Tech app on Spectrum's dashboard, log in and see work orders or jobs they have been assigned.
